

# PROJECT PROFILE

The Advanced Materials Centre

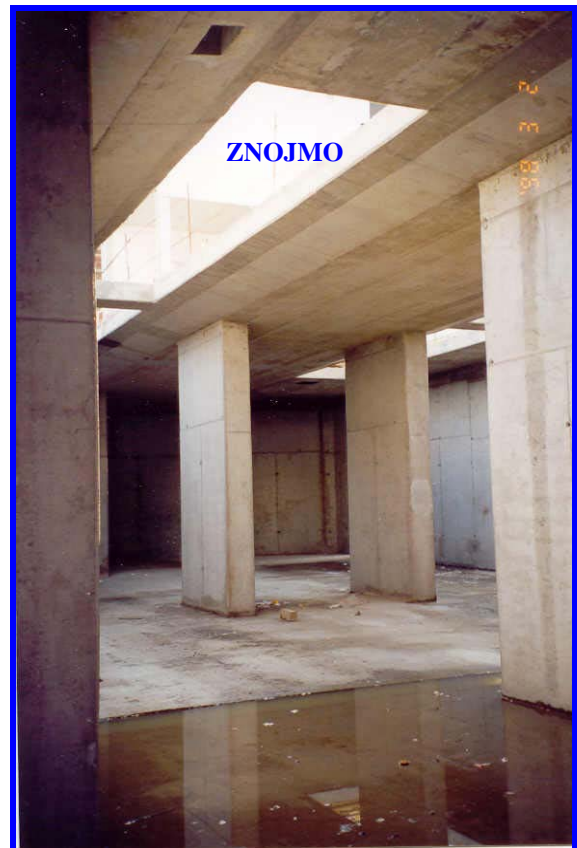

**Project:** Repair and waterproofing of existing municipal waste water treatment facility in Brno and waterproofing of a new underground storage facility and waste water treatment facility of the Saint Gobain Company plant in Znojmo, the Czech Republic

**Designer:** Aquatis s.r.o. (Brno), Hansen CR (Znojmo).

**Contractor:** Various contractors depending on project.

**Gemite product:** **Cem-Kote Flex ST and Cem-Kote CW Plus (crystalline waterproofing)**

**Objective:** in the Brno project the key objective was the repair and waterproofing of existing municipal wastewater treatment facility. A highly flexible **Cem-Kote Flex ST** was used. In the Znojmo project, the **Cem-Kote CW Plus (the crystalline waterproofing)** provided waterproofing to an underground storage facility area in excess of 30,000 m<sup>2</sup>. **Cem-Kote Flex ST** was used in the waterproofing of the wastewater treatment plant of the company.
