

FOR IMMEDIATE RELEASE

1 October 2005

FLEXIBLE Polymer Cement Coating = Cem-Kote FLEX

Gemite offers novel Flexible Waterproofing Material utilizing an Advanced Polymer Cement Technology. Cem-Kote FLEX Line has been formulated to satisfy most stringent performance requirements and to provide superior flexibility from -22°F to +140°F (-30°C to +60°C). The non-toxic, solvent-free products are applied by spray, brush, roller or trowel. Result is a Crack-Bridging, Waterproof and Chemically Resistant Membrane providing seamless, permanently elastic and durable protection against penetration of water, carbon dioxide, chlorides and other chemicals. Cem-Kote FLEX is ideal for waterproofing of reservoirs, water and sewage tanks, manholes, tunnels, decks, vaults, foundations and secondary containment structures in both new construction and restoration. It is also used as a coating in protection of reinforced concrete structures, e.g. bridges – see the attached photo:

- Seamless, permanently elastic & Durable Waterproofing (Negative & Positive side)
- Water Based (VOC compliant) & fully Breathable
- Prevents penetration of Water, Carbon Dioxide, Chlorides and other chemicals
- Protects against future Rebar Corrosion
- Easy to apply by Brush, Trowel, Roller or Spray
- Excellent adhesion to Old & New Concrete, Steel and Wood
- Available in white, grey, light grey and selected pastel colours
- ANSI/NSF 61 potable water approval
