

**FOR IMMEDIATE RELEASE**

19 December 2005

**WATER-BORNE ANTI-GRAFFITI SEALER = Graffiti-Shield ST**

Gemite Group introduces an advanced solvent-free Anti-Graffiti Sealer formulated to provide an excellent protection against graffiti defacement, without changing the surface appearance. The highly breathable Graffiti-Shield ST utilizes an Advanced Polymer Technology, resulting in a thin, clear film that prevents adhesion of spray paint and other defacing materials. Graffiti-Shield ST is applied using a low-pressure sprayer, or a short nap roller, and is non-toxic, non-flammable and non-gloss. Gemite also supplies a non-hazardous, non-flammable Graffiti Cleaner to easily remove any graffiti material from surface, by simply spraying the affected area, and after 10-15 minutes the graffiti can be removed using 2,000 psi pressure water. The Graffiti-Shield ST film withstands 20-30 cleanings, after which a Re-Coat material is applied. The attached photo shows building treated with the Graffiti-Shield ST.

The key advantages of the Graffiti-Shield ST wall sealer are:

- Low gloss, clear anti-graffiti sealer
- Water based (VOC compliant) & fully breathable
- Water repellent
- Easy to apply by Roller or Spray
- Excellent adhesion to old & new concrete, brick, stone, masonry and steel
- Easy graffiti removal
- Suitable also for “rough” (brick & block) and textured surfaces
- Highly economical
