

Concrete Protection Coatings – Tuff-Flex

Gemite Products Inc. offers Tuff-Flex, a unique, one component, water based, chemically cross-linked, acrylic coating, suitable for protection and waterproofing of vertical surfaces of concrete and masonry structures. The highly flexible coating provides crack bridging, carbonation resistance and protection from acid rain. Tuff-Flex is easily applied by brush, roller or a paint sprayer and exhibits an excellent adhesion, long-term durability and UV resistance. The unique cross-linking chemistry provides a high recovery on cycling. The result is a highly economical coating that allows crack bridging at low thickness (7-9 dry mills), and also offers flexibility at low temperatures, resulting in a very long-term performance.

Tuff-Flex offers:

- Superb Elongation & Recovery on Cycling
- Crack Bridging at Low Temperatures
- Excellent Waterproofing
- High Durability & Long Term Performance
- Superior Adhesion to Substrate
- Excellent Carbonation Resistance
- Breathability
- Resistance to Dirt Pick Up
- Exceptional UV Resistance
- High Resistance to Acid Rain
- Easy Application
- Highly Economical
- Environmentally Friendly
